

# EDI development

ANSI X12, AS2 or EDIFACT, HIPAA or HL7!

## How can we help you with EDI development?

We offer custom software development for business to business (B2B) integration solutions using ANSI X12 or EDIFACT, including trading partner management, AS2, certificates and connectivity to warehouse management systems. We can develop EDI solutions that can run on premise or in the cloud as a subscription service. We also develop EDI solutions for health care, including HIPAA and HL7.

### What we do?

Certified in BizTalk EDI app development

Creative programmers designing scalable EDI solutions

Connect on premise systems to eCommerce platforms using Logic Apps

We can conduct a Cloud Assessment to better understand your EDI needs

Provide Operational Analytics via Application Insights and Power BI

Develop EDI applications that run in the Cloud as a subscription service

Provide management and monitoring services to reduce down time

### Why Enkay?

We are a certified **Microsoft Gold Partner** for Application Integration.

Our developers are well trained in EDI, BizTalk Server and Azure development, and have experience in all aspects of application life cycle management.

As EDI specialists, we have a proven record of successfully helping our customers reduce operational costs, improve efficiency and meet uptime SLAs by recommending changes based on best practices that we have curated over multiple successful engagements.

We help our customers quickly scale their development teams to meet demand, and lower costs by using a combination of offshore and onsite developers.

**"Appreciate all your hard work and contribution to the quick resolution of some of our Ops related problems!"**  
- Sr. Manager, Operations, IT at a large Midwest Insurance Company
